### Project Description

According to bank documents, the project objectives are to (i) increase access and usage of financial services and (ii) increase access to economic opportunities for low-income households and micro, small, and medium enterprises (MSMEs), including the informal sector, within target locations in Mozambique.

The project seeks to address structural challenges and market failures that prevent MSMEs, including the informal sector, and low-income households or individuals, from accessing and using financial services and take advantage of economic opportunities. It focuses on addressing supply-side problems that limit the development and reach of innovative financial services in Mozambique, as well as tackling demand-side issues associated with subdued economic opportunities. Addressing these failures jointly allows for a comprehensive approach to promote livelihoods, jobs, and economic transformation while improving the environment for financial solutions. The project is expected to leverage private capital by de-risking lending to underserved groups. The project will work with other bank operations (e.g., macro-fiscal, energy, transport, digital, agriculture, environment, social protection, and poverty -- see Annex VI) as well as IFC investments in financial sector, agribusiness, energy, and housing construction.
