Project Description

As stated by the World Bank, the project development objective is to enhance road access in selected rural areas in support of livelihoods of local communities and to provide immediate response to an eligible crisis or emergency as needed.

The second AF will be used to better climate proof the road infrastructure to protect against future rainfall events. The second AF will ensure rehabilitation and OPRC maintenance of all 1,400 km of feeder roads as well as rehabilitation and OPRC maintenance of 67.7 km national roads, both ongoing activities under the parent project, and allow ANE to fully execute the pilot rural transport services and road safety activities needed to strengthen existing works under the project. The proposed second AF will adhere to the same implementation arrangements of the parent project.
