Project Description

As stated by the World Bank, the project development objective is to accelerate the development of low-carbon energy in India.

Early Warning System Project Analysis

As stated by the World Bank, the overall residual risk rating for the operation is substantial. Some of the PAs may have significant social implications linked to RE and GH development, such as land acquisition resulting in loss of livelihood, involuntary resettlement, labor issues, occupational and community health and safety issues, and reduced freshwater availability. Large manufacturing activities are likely to have environmental and ecological impacts depending on the location of such activities, and GH and other RE sources (solar, wind, offshore wind).

ACCESS TO INFORMATION

To submit an information request for project information, you will have to create an account to access the Access to Information request form. You can learn more about this process at: <https://www.worldbank.org/en/access-to-information/request-submission>

ACCOUNTABILITY MECHANISM OF THE WORLD BANK

The World Bank Inspection Panel is the independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by a World Bank-financed project. If you submit a complaint to the Inspection Panel, they may investigate to assess whether the World Bank is following its own policies and procedures for preventing harm to people or the environment. You can contact the Inspection Panel or submit a complaint by emailing ipanel@worldbank.org. Information on how to file a complaint and a complaint request form are available at: <https://www.inspectionpanel.org/how-to-file-complaint>
