Project Description

According to the Bank's website, the objective of this project is to improve access to and equitable provision of high-quality PHC services, with a focus on RMNCAH+N, while strengthening health systems.

Early Warning System Project Analysis

The overall E&S risk for the PforR AF is substantial. There may be limited risk of social exclusion due to the inaccessibility of health facilities and construction-related small-scale displacement. Beyond the PforR activities, the current social conflict in some parts of the country could disrupt the smooth implementation of the Program in conflict-affected areas.

Investment Description

- World Bank (WB)
