Investment Type(s)	Guarantee
Investment Amount (USD)	\$ 654.90 million
Project Cost (USD)	\$ 1,091.50 million

Project Description

As stated by the World Bank, the development objective of the Green Export Project for Türkiye is to support Turkish exporters in their green transition and to expand green exports through longer-term financing. The project includes one component which will utilize the commercial financing raised by Eximbank with the support of the International Bank for Reconstruction and Development (IBRD) guarantee to directly extend sub-loans to eligible exporters exclusively for greening purposes.

It is estimated that the following sectors will be eligible for financing, with details to be agreed during Project preparation:

(i) EOSMEs and EOMCEs operating in the six initial CBAM sectors: cement, iron and steel, aluminum, fertilizers, electricity, and hydrogen;

(ii) EOSMEs and EOMCEs operating in the sectors considered for the second and later stages of CBAM includes the following: manufacture of food products, textile products, chemicals and chemical products, rubber and plastic products, computers, electronic and optical products, electrical equipment manufacturing, construction, water transportation, and airways transportation.

The loan proceeds are expected to be used to finance energy and water efficient machinery and equipment. Beneficiary exporters will use the financing from Eximbank to replace machinery with more energy-efficient products or purchase machinery to produce

solar energy to become greener, among others, with the aim to reduce direct and indirect GHG emissions resulting from their operations. No new construction or production expansion will be financed.

Early Warning System Project Analysis

The World Bank categorized the project E&S risks as 'FI-2'.

Investment Description

• World Bank (WB)

Financial Intermediary

Financial Intermediary: A commercial bank or financial institution that receives funds from a development bank. A financial intermediary then lends these funds to their clients (private actors) in the form of loans, bonds, guarantees and equity shares. Financial intermediaries include insurance, pension and equity funds. The direct financial relationship is between the development bank and the financial intermediary.

• Turkiye Ihracat Kredi Bankasi Anonim Sirketi (Türk Exim Bank) (Financial Intermediary)

Private Actors Description

As stated o the company's website, in the early 1980s, traditional import substitution policies began being replaced by foreign oriented policies and thereafter exportation gained a high degree of importance to the Turkish economy. The task of supporting exports within this reorganization process was undertaken by Turk Eximbank, established in 1987 as Turkey's official export credit agency.

As a means of aiding export development, Turk Eximbank offers specialized financial services to exporters, export-oriented manufacturers, and overseas investors and contractors through a variety of short, medium, and long-term cash and non-cash credit, insurance, and guarantee programs.
