Project Description

According to bank's website, the proposed Dam Rehabilitation and Improvement Project - 2 (DRIP - 2) aims to build on the lessons and successes of the first DRIP. The project will finance structural improvements but would break with the prevailing 'build-neglect-rebuild' approach by giving greater emphasis to establishing sustainable mechanisms for financing regular O&M and periodic dam rehabilitation, enhancing State capabilities to manage these critical assets through institutional reform and strengthening, and introducing risk-based dam management. The project would address dam safety concerns in the participating States (including institutional reforms and modernization, instrumentation, etc.), although dam rehabilitation per se will focus on a selection of dams within the States.

ACCOUNTABILITY MECHANISM OF THE WORLD BANK

The World Bank Inspection Panel is the independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by a World Bank-financed project. If you submit a complaint to the Inspection Panel, they may investigate to assess whether the World Bank is following its own policies and procedures for preventing harm to people or the environment. You can contact the Inspection Panel or submit a complaint by emailing ipanel@worldbank.org. Information on how to file a complaint and a complaint request form are available at: <https://www.inspectionpanel.org/how-to-file-complaint>
