Project Description

According to bank documents, the project objective is to protect poor and vulnerable households' consumption in response to shocks in Zambia.

The Second Additional Financing will scale up Component 1: Social Cash Transfer. This will enable the SCT to scale up both vertically and horizontally with emergency cash assistance to address the on-going drought effects on poor and vulnerable households that are disproportionately impacted by climate-induced and other shocks. Efforts will also be given to strengthen institutional capacity and social protection delivery systems for more effective and accountable shock response, complemented by on-going Bank-funded social protection projects aimed at greater climate adaptation and resilience.

The project objective, institutional and implementation arrangements, fiduciary, and environmental and social management will remain unchanged. However, a project restructuring will be undertaken to extend the closing date and update the results framework in line with the new activities proposed under the AF2.
