Project Description

According to bank's website, the proposed project aims to implement an integrated and community-based local development planning process with the objective of improving livelihoods and housing for PVTG households. The project will start with community mobilization and facilitation of an inclusive, multisectoral planning process in select villages that is anchored in the broader annual Gram Panchayat (GP) development planning approach to identify key gaps in areas of convergence and systematically include the voices of PVTG households. It will then deliver a set of coordinated investments in socio-economic infrastructure and livelihoods based on identified community needs and village plans and targeting specific PVTG clusters. The project will support replication, alongside awareness raising and peer-to-peer learning to generate interest and scalability for further such coordinated and context appropriate village investments.
