Forest Connectivity, Conservation and Sustainable management in
Colombian Amazon landscapes - Life Amazon

Quick Facts

Countries	Colombia
Financial Institutions	World Bank (WB)
Status	Approved
Bank Risk Rating	A
Voting Date	2026-05-15
Borrower	Fund for Life and Biodiversity, represented by Fiduciaria Colombiana de Comercio Exterior - Fiducold
Sectors	Agriculture and Forestry
Investment Type(s)	Loan
Investment Amount (USD)	\$ 24.28 million
Loan Amount (USD)	\$ 24.28 million
Project Cost (USD)	\$ 24.28 million

Project Description

According to the development objective is to improve biodiversity conservation, connectivity, and forest governance in selected Colombian Amazon landscapes.

The Colombian government has prioritized the protection of the Amazon region and has launched a multi-sectoral strategy to stop deforestation at zero by 2030, promoting forest management and restoration with a focus to maintain and restore connectivity, improving the well-being of local communities, and fostering the conservation of biodiversity and ecosystem services; contributing to peacebuilding processes in the region. The proposed operation aligns with such strategy fostering a structural transformation from deforestation hotspots to inclusive sustainable development nuclei, considering local knowledge and strengthening community governance. All the interventions will be aligned with government goals and commitments related to climate change mitigation, adaptation, restoration, and biodiversity conservation. The project will include a set of integrated interventions that will allow to protect and restore connectivity between protected areas, indigenous territories, and forest reserve areas, contain deforestation, recover degraded areas, and implement sustainable livelihoods and production alternatives for timber and non-timber forest products. Policy and enabling conditions will strengthen community and institutional governance as an essential pathway to the needed transformations that the project aims to move forward. The proposed project will address the systemic challenges related to the loss of forests, biodiversity, and ecosystem services in the Colombian Amazon with an integrated approach that combines conservation, restoration, and sustainable use with a connectivity purpose, through four components: Component 1 - Conservation of high biodiversity areas under different protection regimes Component 2 - Sustainable production and restoration Components 3 - Governance and policies for conservation, restoration, and sustainable development Component 4 - Project management, monitoring, knowledge and communications

ACCESS TO INFORMATION

To submit an information request for project information, you will have to create an account to access the Access to Information request form. You can learn more about this process at: <https://www.worldbank.org/en/access-to-information/request-submission>

ACCOUNTABILITY MECHANISM OF THE WORLD BANK

The World Bank Inspection Panel is the independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by a World Bank-financed project. If you submit a complaint to the Inspection Panel, they may investigate to assess whether the World Bank is following its own policies and procedures for preventing harm to people or the environment. You can contact the Inspection Panel or submit a complaint by emailing ipanel@worldbank.org. Information on how to file a complaint and a complaint request form are available at: <https://www.inspectionpanel.org/how-to-file-complaint>
