Early Warning System Project Analysis

The project is assessed to have low environmental and social risks. The objective of the project is to support the institutional and capacity building of selected ministries of the government of RMI and government of FSM to improve management of public funds and expenditure realized by improved project support functions, which is to be achieved by improving the performance of fiduciary, E&S and M&E management capabilities, and developing sustainable human resources. The project activities are all institutional strengthening and capacity building activities and do not support any civil works, nor any feasibility studies/technical design for future physical infrastructure. Therefore, the project is not expected to have any direct impact on natural habitats or cultural heritage sites, nor support any activity that leads to involuntary resettlement.
