#### **Project Description**

According to the WB, the Project Development Objective (PDO) is to improve quality, reduce emissions and enhance the city's capacity to manage its transport system. This MPA Phase 2 Project, aligned with the Program's long-term objectives, will advance the decarbonization and modernization of Salvador's public transport system. It will improve service quality and operational efficiency through the deployment of approximately 100 e-buses in BRT corridors and the construction of two advanced charging hubs. The Project also includes upgrades to BRT infrastructure to enhance safety, accessibility, and climate resilience, along with complementary investments in cycling networks and cutting-edge technologies such as smart traffic lights and traffic monitoring systems supported by digital platforms for real-time service performance monitoring. In parallel, it will strengthen institutional and operational capacity through targeted workforce development programs, emphasizing gender inclusion and diversity in the transport sector.
