### Project Description

According to the WB, the development objective is to support the development of new technologies and catalyze financing for low-carbon industrial commodities and fuels, and common-user infrastructure, across selected industrial and energy value chains in the Northeast region of Brazil.

The Project Development Objective is to support the development of new technologies and catalyze financing for low-carbon industrial commodities and fuels, and common-user infrastructure, across selected industrial and energy value chains in the Northeast region of Brazil. The financial resources provided by the Project will enable companies to incorporate innovative technologies in their productive processes, utilizing a lower cost of capital. Local industries adopting new technologies to decarbonize the energy and industrial sectors will benefit from a first mover advantage and from the creation of green value chains that can help them to remain competitive. They may also benefit by obtaining green premiums for products that have reduced emissions throughout their production lifecycle. Developers of CUI will also provide spill over benefits throughout the value chain such as incentivizing the integration of additional renewable energy generation, developing new uses of clean hydrogen for the industry, such as SAFs, fostering circular economy for water usage and other utilities, and creating additional direct and indirect jobs. In addition, BNB will benefit from acquiring new risk assessment skills for innovative technologies.

### Investment Description

- World Bank (WB)

### Financial Intermediary

Financial Intermediary: A commercial bank or financial institution that receives funds from a development bank. A financial intermediary then lends these funds to their clients (private actors) in the form of loans, bonds, guarantees and equity shares. Financial intermediaries include insurance, pension and equity funds. The direct financial relationship is between the development bank and the financial intermediary.

### Contact Information

No contacts available at the time of disclosure

### ACCESS TO INFORMATION

To submit an information request for project information, you will have to create an account to access the Access to Information request form. You can learn more about this process at: <https://www.worldbank.org/en/access-to-information/request-submission>

### ACCOUNTABILITY MECHANISM OF THE WORLD BANK

The World Bank Inspection Panel is the independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by a World Bank-financed project. If you submit a complaint to the Inspection Panel, they may investigate to assess whether the World Bank is following its own policies and procedures for preventing harm to people or the environment. You can contact the Inspection Panel or submit a complaint by emailing [ipanel@worldbank.org](mailto:ipanel@worldbank.org). Information on how to file a complaint and a complaint request form are available at: <https://www.inspectionpanel.org/how-to-file-complaint>
