Philippines Government Modernization Project

Quick Facts

Countries	Philippines
Financial Institutions	World Bank (WB)
Status	Proposed
Bank Risk Rating	B
Voting Date	2027-07-01
Borrower	Government of the Philippines - Commission on Audit; Department of Budget and Management
Sectors	Climate and Environment, Law and Government
Investment Type(s)	Loan
Investment Amount (USD)	\$ 390.00 million
Project Cost (USD)	\$ 400.00 million

Project Description

According to the Bank's website, the objective of this project is to improve the efficiency, accountability and resilience of public resource management.

The proposed project will support the Government's priorities for digital transformation of the public financial management (PFM) system in-line with Philippines PFM Roadman 2024-2028 and Philippine Development Plan 2023-2028 (PDP). The reform will be transformative for performance of government PFM functions, accountability, evidence-based policy, sustainability and resilience to climate and disaster risk. Advancing digitalization of core government systems beyond initial integrated financial management information system (IFMIS) modules to cover the entire cycle of public asset management could better inform public procurement and investments in terms of climate risks, life cycle cost, and budgeting for operation and maintenance. The modernization and integration of systems will increase efficiency, enhance transparency, reduce the transaction cost (time and price) and environmental footprint (time in commute, saving paper, fuel and CO2 emissions).

Early Warning System Project Analysis

The environmental risk is **moderate**. The project will upgrade IT infrastructure by procuring computers, servers, and related equipment to improve digital data management and solutions. No civil works, renovations, or construction for hardware components will be financed, minimizing risks linked to physical infrastructure. The project will not affect high-value or sensitive environmental areas and is not expected to result in serious or complex adverse effects. The main environmental risks are predictable, and site-specific, primarily involving increased e-waste and higher energy consumption during operation.

The social risk is **low**. The project activities center on hardware, software, and technical assistance, with no foreseen land acquisition, no involuntary resettlement, no adverse impacts on Indigenous Peoples, and no effects on tangible or intangible cultural heritage. Sexual exploitation and abuse and sexual harassment (SEA/SH) risks are considered low given the country's robust legal and institutional framework. Labor and working-condition risks are minimal because activities focus on systems development rather than heavy manual work.

Investment Description

- World Bank (WB)

Total Project Cost: US\$ 400.00 million

IBRD Commitment: US\$ 390.00 million

Borrower/Recipient: US\$ 10.00 million

ACCESS TO INFORMATION

To submit an information request for project information, you will have to create an account to access the Access to Information request form. You can learn more about this process at: <https://www.worldbank.org/en/access-to-information/request-submission>

ACCOUNTABILITY MECHANISM OF THE WORLD BANK

The World Bank Inspection Panel is the independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by a World Bank-financed project. If you submit a complaint to the Inspection Panel, they may investigate to assess whether the World Bank is following its own policies and procedures for preventing harm to people or the environment. You can contact the Inspection Panel or submit a complaint by emailing ipanel@worldbank.org. Information on how to file a complaint and a complaint request form are available at: <https://www.inspectionpanel.org/how-to-file-complaint>
