Investment Type(s)	Loan
Investment Amount (USD)	\$ 250.00 million
Loan Amount (USD)	\$ 250.00 million
Project Cost (USD)	\$ 250.00 million

Project Description

According to the WB, the development objective is to strengthen the aviation sector governance framework; and improve the operational safety and resilience of selected airports.

The Guatemala Civil Aviation Recovery Program Project aims to strengthen the country's air transport sector by strengthening the institutional foundations of Guatemala's civil aviation sector while improving safety, security, and climate resilience at selected airports and aerodromes. It will contribute to improved national and regional connectivity, economic competitiveness, and climate-resilient development. The Project will assist establishing two new entities to regulate and operate the sector, guiding their effective institutional design, establishment, governance, and long-term functioning with policies and planning aligned to international best practices. The Project will also deliver comprehensive training, technical assistances, and studies to strengthen institutional and technical capacities in the aviation sector. This will include the development of continuous training aligned with ICAO SARPs as well as updated licensing and certification programs for oversight and operational personnel, improving overall safety levels and promoting gender inclusion, particularly by increasing the participation of women in the aviation sector. It includes the rehabilitation of infrastructure and air navigation systems, enhanced runway safety and resilience to climate events, improved airport and aerodrome perimeter security, implementation of advanced safety management systems, and construction of environmentally sustainable facilities, incorporating energy-efficiency measures aimed at reducing the carbon footprint. Institutional capacity building will support the Civil Aviation Authority to enhance regulatory and operational capacities. Additionally, the program will provide technical, operational, and fiduciary support to the Project Implementation Unit to ensure effective implementation, as well as resources for project management, E&S compliance, and stakeholder engagement.

Contact Information

ACCESS TO INFORMATION

To submit an information request for project information, you will have to create an account to access the Access to Information request form. You can learn more about this process at: <https://www.worldbank.org/en/access-to-information/request-submission>

ACCOUNTABILITY MECHANISM OF THE WORLD BANK

The World Bank Inspection Panel is the independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by a World Bank-financed project. If you submit a complaint to the Inspection Panel, they may investigate to assess whether the World Bank is following its own policies and procedures for preventing harm to people or the environment. You can contact the Inspection Panel or submit a complaint by emailing ipanel@worldbank.org. Information on how to file a complaint and a complaint request form are available at: <https://www.inspectionpanel.org/how-to-file-complaint>
