Project Description

According to bank's website, the approved project aims to (i) enable private sector financing and investment, (ii) attract skilled labor to jobs, and (iii) advance cross-border market integration. The operation supports policy and institutional reforms across three areas of work. Under enabling private sector financing and investment, it modernizes the public-private partnership and concession framework to accelerate preparation and allow viability gap funding; expands access to finance for firms by establishing a modern legal regime for factoring and strengthening the governance and independence of the National Development Institution to scale market-based support for MSMEs; and reduces the state footprint and corruption risks by mandating corporatization of state-owned enterprises, advancing the privatization of state-owned banks through the selection of sales advisors, and improving SOE oversight.
