Project Description

According to the WB, the development objective is to enhance the efficiency, effectiveness, and accountability of public financial management in Honduras.

The MPA program aims to enhance efficiency, effectiveness and accountability of public expenditures by deploying smart, data-driven PFM solutions. It focuses on addressing challenges related to inefficiencies in the use of public resources, the suboptimal allocation and utilization of public spending in strategic sectors, the limited adoption of evidence and data analytics for policy making and operations, and the existing vulnerability and technical weaknesses of existing management information systems. The program will support interventions around four pillars aiming at strengthening the foundations for data-driven public expenditure management (Smart PFM), supporting the optimization of expenditure management in strategic sectors (i.e. education, health, security and others), establishing a secure, sustainable PFM information ecosystem and developing the institutional capabilities and knowledge sharing mechanisms for the effective use and absorption of data analytics practices in government institutions.

ACCOUNTABILITY MECHANISM OF THE WORLD BANK

The World Bank Inspection Panel is the independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by a World Bank-financed project. If you submit a complaint to the Inspection Panel, they may investigate to assess whether the World Bank is following its own policies and procedures for preventing harm to people or the environment. You can contact the Inspection Panel or submit a complaint by emailing ipanel@worldbank.org. Information on how to file a complaint and a complaint request form are available at: <https://www.inspectionpanel.org/how-to-file-complaint>
