Guinea Electricity Access Scale Up Project-Phase 2

WB-P511453

Quick Facts

Countries	Guinea
Financial Institutions	World Bank (WB)
Status	Approved
Bank Risk Rating	A
Voting Date	2025-06-30
Borrower	Republic of Guinea
Sectors	Energy
Investment Type(s)	Loan
Investment Amount (USD)	$ 132.30 million
Loan Amount (USD)	$ 132.30 million

Project Description

According to the Bank’s website, the objective of this project is to: (i) increase grid and non-grid access to electricity services in selected areas; and (ii) improve the operational performance of the power utility. There are four components to the project, the first component being the reinforcement and expansion of grid access and the improvement of the commercial performance of EDG. This component includes three subcomponents: reinforcement and expansion of grid access in Kindia and Labe, reinforcement and expansion of grid access in Mamou, Pita, Dalaba, and rural electrification, and operational improvements and digitalization of EDG. The second component is the off-grid electrification with privately operated hybrid mini-grid systems. This component aims to scale up the pilot program to electrify rural localities through privately operated hybrid mini-grids, launched under GNEAP-1. The third component is the support for reform actions and the financial sustainability of the energy sector. This component includes three subcomponents: technical assistance for electricity sector modeling and tariff reform, technical and institutional support for performance-based utility management, and generalization of pre-paid meters in non-strategic public institutions 40 across the country. Finally, the fourth component is the implementation support, technical assistance, and capacity building. This component includes five subcomponents: project implementation, owner's engineer, compensations and payments under RAP, development and implementation of a gender policy, and capacity building, studies, and technical assistance.

Early Warning System Project Analysis

Environmental and Social Risk: S

Investment Description

- World Bank (WB)

Total Project Cost: US$ 0.00 million

Commitment Amount: US$ 232.30 million

IBRD + IDA Commitment: US$ 132.30 million

IDA Credit: US$ 107.10 million

IDA Shorter Maturity Loan (SML): US$ 25.20 million

ACCESS TO INFORMATION

To submit an information request for project information, you will have to create an account to access the Access to Information request form. You can learn more about this process at: https://www.worldbank.org/en/access-to-information/request-submission

ACCOUNTABILITY MECHANISM OF THE WORLD BANK

The World Bank Inspection Panel is the independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by a World Bank-financed project. If you submit a complaint to the Inspection Panel, they may investigate to assess whether the World Bank is following its own policies and procedures for preventing harm to people or the environment. You can contact the Inspection Panel or submit a complaint by emailing ipanel@worldbank.org. Information on how to file a complaint and a complaint request form are available at: https://www.inspectionpanel.org/how-to-file-complaint
