Project Description

According to bank's website, the approved program is part of a Multiphase Programmatic Approach (MPA) to strengthen domestic revenue mobilization (DRM) in West and Central Africa (AFW). In Cote d'Ivoire, the operation supports increased domestic revenue mobilization through reduced forgone tax revenue and increased tax productivity and voluntary compliance. This operation, building on the achievements of the Enhancing Government Effectiveness for Improved Public Services (P164302), supports greater efficiency in domestic revenue mobilization to create fiscal space to fund service delivery and interventions to improve public expenditure management efficiency in selected areas. The three results areas include (i) Enhance tax policy, (ii) Strengthened tax and customs administration, and (iii) Improve public expenditure management. To support the implementation of the Program, an Investment Project Financing (IPF) component will ensure effective change management, proper verification of DLIs, capacity building, and technical assistance (TA) to project stakeholders, regional peer learning for the MPA, as well as monitoring and evaluation, project management and coordination. Required technical experts will be provided under the TA, in particularly demanding domains to ensure well-designed inputs and quality assurance.
