Project Description

According to bank's website, the approved program aimed at reducing the investment gap in key sectors and revitalizing aging, poorly maintained infrastructure. Among its priorities are feeder roads, which play a crucial role in linking rural areas to main transport corridors. Investing in feeder roads is essential to connect farms and rural communities with markets, reduce transport costs and post-harvest losses, and improve access to services. Strengthening these networks will boost agricultural productivity, competitiveness, and inclusive growth, while better connecting isolated regions of the country. The proposed operation will support (i) the rehabilitation of selected feeder roads linked to key agricultural value chains, (ii) the maintenance of the rehabilitated roads and Road Maintenance Trust Fund reform operationalization, and (iii) project management and OHS enhancement. The proposed operation will be structured around 3 components: Component 1: Feeder road rehabilitation Component 2: Road maintenance and support to Road Maintenance Trust Fund (RMTF) Component 3: Project management and implementation support.
