Project Description

According to bank's website, the proposed project aims to finance the construction of public (Ministry of Health) hospital facilities in Turkiye. The operation will finance the design, construction, and commissioning of public hospital facilities to deliver seismically resilient, climate-adapted, and operationally ready secondary and tertiary care infrastructure in Turkiye. The project has three components covering activities required to deliver seismic, climate, and operationally resilient public hospital infrastructure. Component 1 specifically addresses PDO’s seismic and climate strengthening aspects and it will finance the design, design review, construction and supervision of 34 MOH public hospital facilities across 19 provinces, together with all essential utility and lifeline systems and it is limited to civil works and complementary consulting services. Component 2 specifically addresses PDO’s operational resilience strengthening aspect and it will finance technical and advisory activities that complement the civil works under Component 1. Component 3 will finance the institutional capacity required to implement the project efficiently and in compliance with World Bank policies, under MOH leadership as the implementing agency.
