GCF-FP020

Sustainable Energy Facility for the Eastern Caribbean

Quick Facts

Financial Institutions	Green Climate Fund (GCF)
Status	Approved
Bank Risk Rating	A
Voting Date	2017-10-01
Borrower	Caribbean Development Bank (CDB)
Sectors	Energy
Investment Type(s)	Grant, Loan
Investment Amount (USD)	\$ 80.00 million
Loan Amount (USD)	\$ 60.00 million
Grant Amount (USD)	\$ 20.00 million
Project Cost (USD)	\$ 190.47 million

Project Description

Financing commercial Geothermal Energy (GE) projects whilst strengthening legal and regulatory frameworks to underpin the development of GE potential in the East Caribbean region.

According to the Green Climate Fund, five East Caribbean states (Dominica, Grenada, Saint Kitts & Nevis, Saint Lucia and Saint Vincent & Grenadines) have small and isolated electricity markets that depend heavily on imported liquid fossil fuels for electricity generation. In pursuit of United Nations Sustainable Development Goal number 7 (affordable and clean energy), the Green Climate Fund says Geothermal Energy (GE) presents the largest available renewable energy resource, with the potential to provide low cost, reliable electricity generation.

The main barriers to GE development are the high investment cost, high uncertainty during early development stages, lack of access to capital and ability to finance through public debt, inadequate regulatory and policy frameworks, and other factors such as lack of technical skills and economies of scale.

The Green Climate Fund says that the Sustainable Energy Facility for the Eastern Caribbean will address these financial, technical and institutional barriers by providing institutional strengthening and capacity building, and provide a financing package. This financial package may include concessional loans and reimbursable grants to mitigate exploration and other underlying risks and unlock investments in GE by the private sector, critical to develop GE projects in the region. The end result will be to deliver GHG Emission Reductions of 9.4 million TCO_{2e} during the lifetime of the programme.

Investment Description

The following groups will provide co-financing:

Inter-American Development Bank Loan : US\$20.0 million

Clean Technology Fund Grant: US\$ 19.1 million

Japan International Cooperation Agency Loan:

CDB Loan: US\$10.0 million

Global Environment Facility Grant: US\$1.9 million

Inter-American Development Bank Grant: US\$500.0 thousand

Japan International Cooperation Agency Grant: US\$1.0 million

Department for International Development Grant: US\$18.0 million
