### **Project Description**

The innovation of this proposal is to develop and introduce new technologies and tools to drastically scale the solution aiming to benefit 10,000+ people per year, which is x100 more than the current figure at the end of the project. These new types of digital tools will allow us to reach a mass audience well beyond Specialisterne's global clients, while building local capabilities in local businesses and partners. These tools will ensure that the impact on the development of skills of people with autism and of local clients and partners is much greater.

#### ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IDB Invest)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to [MICI@iadb.org](mailto:MICI@iadb.org). You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
