Investment Amount (USD)	\$ 143.00 million
Project Cost (USD)	\$ 143.00 million

Project Description

According to World Bank documents, this project aims to the effort increase the geographic reach and affordability of broadband networks and to foster an enabling environment for the development of a digital single market at the regional level. The proposed project would aim to advance regional integration of digital markets through the simultaneous integration of the connectivity, data, and online market across the region. Advancement in each distinct market layer is expected to create a virtuous cycle as each segment builds on another, reinforcing the development, expansion and integration of the region's digital market.
