## Project Description

According to the Bank's website, Inside Equity Fund II ("IEF II" or the "Fund"), a Mauritius limited partnership, is targeting US\$100 million to construct a portfolio of investments diversified across Eastern and Southern Africa, which collectively capture the underserved small and medium-sized enterprises ("SMEs") in those regions. IEF II's investment objective is to provide capital to SMEs mainly through equity instruments. The Fund will be supported by the Blended Finance Facility ("BFF") of the IDA19 IFC-MIGA Private Sector Window ("IDA-PSW"), created by the World Bank Group to catalyze private sector investment in IDA-PSW eligible countries ("IDA Countries").

## Early Warning System Project Analysis

This project is classified as FI-2 in accordance with IFC's Policy on Environmental and Social Sustainability, based on the Fund's pipeline and business strategy. The Fund is a closed-end generalist fund targeting Eastern & Southern Africa. It will focus on sectors such as manufacturing, agrobusiness, healthcare, and financial services with potential additional exposure to renewable energy, waste management, consumer goods, and leisure & tourism. The activities in these sectors typically have limited adverse environmental and social risks and impacts that are few in number, site specific, largely reversible and can be readily addressed through mitigation measures.

The main E&S risks and impacts of the Project derive from the E&S risks associated with the Fund's investment activities and its E&S capacity and systems in place to manage these risks. These risks typically include labor and working conditions, occupational health and safety, waste management, and community impacts, among others.
