### Project Description

According to ADB's website, the Highlands region of Papua New Guinea (PNG) consists of seven landlocked provinces where approximately 40% of the population resides, most of whom are involved in rural smallholder agricultural production. Aside from abundant and underemployed labor resources, the region is endowed with agricultural and mineral resources which serve as an engine of growth for the national economy. The 1,200 km long 2-lane national Highlands Highway is the lifeline for the Highlands region connecting 1,800 km of regional and feeder roads and servicing the region's people particularly those in the rural hinterland. The highway traverses the Highlands region connecting it to the coastal provinces and the country's main port in Lae.

The expected impacts of the project are:

1. Increased opportunity for equality and prosperity in rural areas (Development Strategic Plan, 2010-2030)
2. Attainment of well-integrated, safe, affordable, and financially and environmentally sustainable transport systems that efficiently serve the economy and people of PNG (National Transport Strategy, 2014-2030)
3. Improved access to health and education, and living standards of the people of PNG (National Strategy for Responsible Sustainable Development for Papua New Guinea)

### ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: <http://www.adb.org/site/accountability-mechanism/main>
