IADB-HO-L1179

Sustainable forest management project

Quick Facts

Countries	Honduras
Financial Institutions	Inter-American Development Bank (IADB)
Status	Approved
Bank Risk Rating	B
Voting Date	2016-12-14
Borrower	Republic of Honduras
Sectors	Agriculture and Forestry, Climate and Environment
Investment Type(s)	Loan
Investment Amount (USD)	\$ 25.00 million
Project Cost (USD)	\$ 25.00 million

Project Description

The general objective of the project is to recover and maintain forest ecosystem services in priority watersheds affected by the bark beetle. The specific objectives are: (i) to restore the areas affected by the bark beetle in both public and private forests; (ii) to strengthen the government's forest health system and create forest management alternatives adapted to the impacts of climate change and climate variability; and (iii) to expand access to climate financing to foster sustainable forest management.

Given the nature of project activities, the environmental and social risks and impacts are expected to be temporary and localized, and there are established procedures and knowledge for designing and implementing effective mitigation measures.

Consequently, this project has been classified as a category “B” operation. While the IADB expects the social and environmental effects of the project to be positive, there are environmental and social risks and potential negative impacts, primarily associated with: the introduction of invasive species; land-use changes; risk of natural disasters, mainly fires, floods, and landslides; social conflicts arising from dissatisfaction with the project, especially with the financing of SFM activities, among some members of the communities; unequal access to the system of incentives by low-income social groups and owners, small forest owners, women, and other vulnerable groups; and the risk of work-related accidents.

Investment Description

The proposed operation is a specific investment loan in the amount of US\$25 million, to be disbursed over five years. In total, 60% of the funds are from the IADB's Ordinary Capital (OC) and 40% are from the IADB's Fund for Special Operations (FSO).

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
