## **Project Description**

According to bank documents, the project objective is to support the coordination of the Government's response to the COVID-19 outbreak and the mitigation of its socioeconomic impacts.

To achieve these objectives, the proposed operation focuses on two strategic pillars and five policy areas, targeting both the host communities and refugees. The choice of pillars and policy areas reflects a combination of factors, including economic and social impact mitigation potential, available analytical evidence to underpin reforms, current World Bank Group engagement (including complementarity with other World Bank projects), coordination with the IMF and other development partners, and the government's expressed priorities and reform momentum.
