Project Description

According to the EBRD, the project consist in the provision of up to USD 80 million equity bridge loan to Egypt Green Hydrogen S.A.E, an Egypt domiciled company established for the purpose of developing and operating the first green hydrogen production facility in Egypt.

The Loan will support funding the procurement and construction of a 100 MW electrolyser facility together with the related facilities and civil works needed for the completion of the project. The Electrolyser, which will be powered by renewable energy, will produce green hydrogen that will substitute some of the grey hydrogen (i.e. produced from gas) consumption used by the Egyptian Fertilizer Company (the Offtaker and a subsidiary of the regional fertiliser producer, Fertiglobe PLC) and will be used as input to produce green ammonia which will be exported to the international markets. Being the first project of its kind in Egypt, the Project will lead to a significant demonstration effects and will be an important milestone in the development of a green hydrogen and ammonia industry in Egypt which is a key step towards decarbonising several industries, particularly fertilisers - a main consuming industry for ammonia.

ACCOUNTABILITY MECHANISM OF EBRD

The Project Complaint Mechanism (PCM) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an European Bank for Reconstruction and Development (EBRD)-financed project. If you submit a complaint to the PCM, it may assess compliance with EBRD's own policies and procedures to prevent harm to the environment or communities or it may assist you in resolving the problem that led to the complaint through a dialogue with those implementing the project. Additionally, the PCM has the authority to recommend a project be suspended in the event that harm is imminent.

You can contact the PCM at: pcm@ebrd.com or you can submit a complaint online using an online form at:
