Bangladesh Ghorashal Unit 4 Repowering Project

Quick Facts

Countries	Bangladesh
Specific Location	Ghorashal
Financial Institutions	World Bank (WB)
Status	Active
Bank Risk Rating	A
Voting Date	2015-12-21
Borrower	Government of Bangladesh
Sectors	Construction, Energy
Investment Type(s)	Loan
Investment Amount (USD)	\$ 217.00 million
Project Cost (USD)	\$ 263.00 million

Project Description

This project provides financing for increased generation capacity and efficiency of the Ghorashal power plant. The components of the project include:

- the repowering of unit 4 unit through the attachment of a new gas-fired turbine to the existing 4th steam unit and a heat recovery steam generator, power generator, and associated ancillary equipment;
- the installation of a new 230 kV GIS substation and 230 kV high voltage line;
- the installation of a new gas pipeline;
- technical assistance for institutional strengthening support.

Investment Description

- World Bank (WB)
