Borrower	Government of Argentina
Sectors	Construction, Transport
Investment Type(s)	Loan
Investment Amount (USD)	\$ 324.30 million
Project Cost (USD)	\$ 531.90 million

Project Description

According to the bank, the general objective of the operation is to contribute to the general objectives of the credit line, specifically to: (i) increase capacity; And (ii) improve transportation safety, on the access roads to the Caracoles Tunnel that makes up the Cristo Redentor System Corridor, by constructing variants in urban areas and rectifying curves on the Argentine side. The operation also contributes to the adaptation to the CC through the improvement of the resilience in the interventions.

Investment Description

- Inter-American Development Bank (IADB)

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
