## Project Description

The program's general objective is to contribute to the sustainability of Chile's energy sector through a process of policy reforms in the sector that include technical, economic, social, and environmental aspects and take account of both national and regional needs and interests. The specific objectives are to: (i) develop a long-term energy policy validated by society that helps to make the energy market more competitive and efficient, and build the sector's institutional capacity; (ii) promote diversification and increase the share of renewable energy sources in the energy matrix; (iii) foster efficient energy use; and (iv) increase international energy trading and transfers.

### ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to [MICI@iadb.org](mailto:MICI@iadb.org). You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
