### Project Description

As stated by the ADB, the proposed project aims to (i) improve energy security by increasing the clean energy share in the country's energy mix, which is dominated by fossil fuel generation (over 97%); and (ii) contribute to sector reforms for better governance and public-private partnership (PPP) enabling environment in the development of renewable energy.

The SIREDP comprises of the following three sub-projects:

Sub-project 1 – involves installations on two sites in Honiara:

- Sub-project 1a involves approximately 1.0 MWp ground-mounted solar photovoltaic (PV) array to be installed in Henderson, a site south of the Honiara International Airport. The solar PV array will connect to an adjacent 11kV overhead power line located either within the project boundary or within close proximity to avoid any resettlement impacts.
- Subproject 1b will install an approximate 4 MW / 4 MWh of storage capacity at the Honiara Power Station, adjacent to an existing 11kV switchboard where electrical integration will occur. Another 5 MW / 20 MWh BESS will be installed with grid-forming battery inverters at the Honiara East substation.

Sub-project 2 – Ambu Solar Hybrid will install a solar and battery hybrid system comprising of a 1.5 MWp solar PV ground mounted array and 1.0 MW / 4.0 MWh battery system storage as well as auxiliary components such as electrical substation, switchboard, high-voltage distribution system and controls / communications.

Sub-project 3: This subproject will pilot rooftop solar photovoltaic generation on two schools, one in Guadalcanal and one in Malaita.

### Early Warning System Project Analysis

#### ACCESS TO INFORMATION

You can submit an information request for project information at: <https://www.adb.org/forms/request-information-form>

ADB has a two-stage appeals process for requesters who believe that ADB has denied their request for information in violation of its Access to Information Policy. You can learn more about filing an appeal at: <https://www.adb.org/site/disclosure/appeals>

#### ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: <http://www.adb.org/site/accountability-mechanism/main>.
