Sustainable Natural Resources Management Project (SSNRMP3)
Second Additional Financing

Quick Facts

Countries	Sudan
Financial Institutions	World Bank (WB)
Status	Proposed
Bank Risk Rating	B
Voting Date	2020-05-15
Borrower	Government of Sudan
Sectors	Climate and Environment
Project Cost (USD)	\$ 5.94 million

Project Description

According to bank documents, the project objective remains the same as in the parent project: “to increase the adoption of sustainable land and water management practices in targeted landscapes”.

The project has four components:

- 1. Institutional and Policy Framework.** This component finances technical assistance, workshops, goods, services and operational costs to build or strengthen national, state and local level capacities to strengthen policy and regulatory frameworks, remove critical knowledge barriers, and develop an enabling environment for the on-the-ground activities. The project design hinges on improving the vertical and lateral coordination from the federal to the local community levels and between the various government, non-government and community players.
- 2. Community based sustainable management of rangelands, forests and biodiversity.** This component works on incorporating innovative technologies in community-based sustainable NRM from the menu of interventions that would match socio-economic and physical conditions of specific localities. Subcomponents include: (i) addressing climate change impacts on water resources and agriculture by promoting innovative climate-smart NRM technologies; and (ii) alleviating negative impacts of environmental degradation and climate change on human health.
- 3. Project Management, Monitoring and Evaluation.** Project Management. MANR is the implementing agency for the project. Support is provided for day-to-day project implementation and management including procurement, FM, environmental and social safeguards aspects, preparation of annual work plans and organization of supervision missions. The component provides support for office operating costs including annual audit costs and supervision missions.
- 4. Contingency Emergency Response Component.** This contingency component can be triggered by a joint Government and World Bank agreement in case of an emergency. This component had been embedded in the project to finance early recovery and/or specific emergency works, goods, and services, in case of eligible emergencies/crises/disaster caused by natural or man-made hazard including public health crisis. The mechanism is designed to support enhancement of preparedness, early recovery activities, and provision of rapid response to disaster that can be implemented in a relatively short period.

ACCOUNTABILITY MECHANISM OF WORLD BANK

The World Bank Inspection Panel is the independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by a World Bank-financed project. If you submit a complaint to the Inspection Panel, they may investigate to assess whether the World Bank is following its own policies and procedures for preventing harm to people or the environment. You can contact the Inspection Panel or submit a complaint by emailing ipanel@worldbank.org.

You can learn more about the Inspection Panel and how to file a complaint at:

<http://ewebapps.worldbank.org/apps/ip/Pages/Home.aspx>.
