Project Description

According to the IADB, the general objective is to support the Government of Belize efforts in advancing a just transition for the energy sector. The specific objectives are: (i) Component I: to develop technical studies for the design and implementation of rural electrification projects; and (ii) Component II: to develop a technical study in Caye Caulker island that could support the decarbonization of the energy sector with DG solutions such as solar PV rooftops and electric mobility solutions.

Investment Description

- Inter-American Development Bank (IADB)

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
