Project Description

As stated by the FMO, the purpose of the financing is to fund the approved CAPEX program expected to exceed USD 200mln for the remainder of the current implementation period (covering 2021-2025) to expand, modernize, the distribution network in the UEDAS concession area. FMO provides a senior long term loan of up to USD 30mln equivalent in Turkish Lira and co-invests with two multilateral development banks. The rest of the funding need will be covered by commercial banks as well as equity contribution.

Financing UEDAS' investments fits well with FMO's strategy as it contributes to (among others) the expansion and modernization of the distribution network in a key industrial area of Turkey. Proceeds of the financing are earmarked towards investments leading to improvements in the continuity and quality of supply, grid expansion and renewal as well as implementation of smart grid technologies to further limit faults in the network. FMO's Green Label also applies to this transaction.
