### Project Description

The project is intended to address issues of PRI and watershed management in mountainous provinces of Northern Lao PDR by using an integrated land use planning approach that integrates efficient, sustainable and climate resilient rural infrastructure, and feasible watershed protection measures. For an ecosystem based sustainable rural development, infrastructure and the watershed have to be considered simultaneously. The expected impact of the project will be to achieve sustainable and inclusive rural development. The outcome of the project will be to enhance sustainable, market oriented agricultural production and natural resources management in selected watersheds.

### CONSULTING SERVICES

- (i) A TRTA firm providing 40 person-months (p-m) of international and 70 p-m of national consultants will be recruited through quality-and cost-based selection method using a quality-cost ratio of 90:10 and a full technical proposal.
- (ii) The International Water Management Institute will be recruited through single source selection to provide flood and drought risk assessments (8.5 p-m).
- (iii) Individual consultants, comprising international and national, will be required.

The consultants will be recruited using individual recruitment selection procedures and will be engaged on an intermittent basis by ADB.

### ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: <http://www.adb.org/site/accountability-mechanism/main>
