Project Description

According to the Bank´s website, the general objective of the project is to contribute to digital connectivity in areas far from urban centers through the development and deployment of the federal fiber optic network. Likewise, it is planned to finance the updating of the equipment of the Data Center of Empresa Argentina de Soluciones Satelitales S.A. AR-SAT, which works under the orbit of the Secretariat of Public Innovation of the Chief of Cabinet of Ministers, allowing the Argentine State to have greater data storage and processing capacities. The investment will increase connectivity throughout the country, as well as increase the offer of cloud services, which may be provided to state institutions, municipalities and other organizations that due to their scale do not have the possibility of access to have its own infrastructure.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
