## Project Description

According to IFC documents, the proposed investment is a senior loan of up to INR3,750 mn (approximately US\$51 mn) to Chalet Hotels Limited (Chalet or Company), an owner/developer of hospitality, commercial and retail assets. Chalet's portfolio comprises of 7 upscale, upper upscale and luxury hotels including a serviced apartment project (together, 2,554 keys) as well as two commercial and two retail assets, across Mumbai, Bengaluru (Bangalore), Hyderabad and Pune.

IFC's loan will be used to (i) complete fairly advanced construction of a "green" IFC EDGE-certified commercial asset; (ii) refurbish and upgrade existing hotels and (iii) preserve operational liquidity at a time when hospitality cash flows have been devastated by the worst pandemic in a century.

The proposed IFC investment is up to INR 3750 Million (approximately US\$51 million equivalent) to fund the following projects (the project): Renovation and upgrading of 300 rooms at RHI, Mumbai; Completion of Commercial asset at Marriott Complex in Whitefield, Bangalore; Conversion of Retail space to commercial space at JW Marriott Sahar complex in Mumbai; and General maintenance capex for existing hospitality assets. Part of this investment (completion of the commercial asset in Whitefield, Bangalore), around ~US\$25 million will be considered a green loan.

The most significant, expected Project-level outcome is derived from economy-wide effects by (i) preserving jobs at existing properties, (ii) restarting construction, which would result in the employment of hundreds of daily wage workers, as well as (iii) maintaining timely payments to suppliers including SMEs in the sector that is worst hit by the pandemic. The proposed investment will also (iv) promote greater market resilience in the tourism sector by demonstrating to other players that mixed-use developments create cross-demand and allow for more flexibility as the long-term nature of commercial lease contracts cushion volatility and seasonality of hospitality cash flows, altogether contributing to faster recovery from crises.
