Evaluation of two parenting programs to reduce violence and improve child development ready for school - PIA Trial 3-year follow-up

Project Description

Evaluate the impact of two early childhood parenting programs on child development and social adaptation at age of school entry in Brazil. In 2018 the two parenting programs were implemented in a novel randomized controlled trial. The current project aims to re-assess families who participated in the PIA trial 3-years ago, to assess medium-term effects of these two interventions on parenting practices, aggression against children, coping during the COVID-19 pandemic, and child cognition, mental health, social behavior, and biological indicators related to stress (cortisol, epigenetics).

Investment Description

- Inter-American Development Bank (IADB)

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IDB Invest)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
