Project Description

Sustainable landscape measures to enhance resilience of smallholders, reducing GHG emissions and channelling private finance into climate-smart investments in agriculture and renewable energy.

The project model is to initially address smallholder vulnerability through non-profit activities, that will prepare the smallholding farmers to eventually access private sector investment, providing a pathway out of extreme vulnerability and dependency. This approach is aimed at overcoming the barriers to private sector investment. Funds will be leveraged through the issuing of a pioneering Green / Climate Bond with all returns and profits being re-invested to capitalise a Climate Change Trust Fund for Madagascar. This will enable continued investment in landscape-level adaptation and mitigation activities.
