### **Project Description**

According to the bank document, "the additional financing project will support the implementation of the government's Health Sector Contingency Plan for coronavirus disease (COVID-19).

Additional financing expands the overall project scope to encompass a further 19 district and 12 township hospitals requiring immediate investment to upgrade clinical care, infection prevention and control, and human resource capacity for responding to COVID-19 and other emerging disease threats.

These 31 hospitals are located across the country's 14 states and regions, with 24 hospitals strategically selected for their accessibility to ethnic populations. Activities under the additional financing, all of which fall within the scope of the ongoing project, will be consolidated and delivered under a new project output for efficiency in administration and monitoring".
