<b>Borrower</b>	GOVERNMENT OF DJIBOUTI
<b>Sectors</b>	Energy
<b>Investment Amount (USD)</b>	\$ 23.30 million
<b>Project Cost (USD)</b>	\$ 28.15 million

### Project Description

The development objective of the Sustainable Electrification Program (SEP) Project for Djibouti is to increase access to electricity in the targeted project area. The project comprises of two components. The first component, extension and densification of distribution systems will work in two phases. Phase one will finance the required infrastructure to connect 9,000 households of Balbala to the electricity grid and install 790 new streetlights. Phase two will focus on the electrification of the interior regions of Djibouti following the same technical design. The second component, technical assistance, capacity building, and program management will finance the drafting of a national SEP and relevant technical studies, including an action plan to support the Government of Djibouti (GoDj) in its efforts to achieve: (a) 100 percent electrification rate by 2035, (b) 100 percent renewable energy supply, and (c) reduce urban migration.

### ACCOUNTABILITY MECHANISM OF WORLD BANK

The World Bank Inspection Panel is the independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by a World Bank-financed project. If you submit a complaint to the Inspection Panel, they may investigate to assess whether the World Bank is following its own policies and procedures for preventing harm to people or the environment. You can contact the Inspection Panel or submit a complaint by emailing [ipanel@worldbank.org](mailto:ipanel@worldbank.org). You can learn more about the Inspection Panel and how to file a complaint at: <http://ewebapps.worldbank.org/apps/ip/Pages/Home.aspx>.
