| Investment Amount (USD) | \$ 50.00 million |
| Project Cost (USD) | \$ 50.00 million |

Project Description

According to bank documents, the objectives of this operation are: (i) to improve access to services for both the population and the private sector in selected areas; and (ii) to improve the capacity of local government in the areas of planning, management, and financial management.

The project will comprise four components:

1. Resilient infrastructure investment and service delivery in select towns and adjacent territories (42 million USD): This component aims to support the development of communal or inter-municipal economic and basic infrastructures and services in selected areas (either intermediary cities or newly created towns or adjacent territories) to increase access to services and better manage future urban growth. Infrastructure of interest could consist of urban roads, urban drainage systems, electricity lines, solid or liquid waste management infrastructure, public facilities and space for youth, regional or local markets, etc. All infrastructure will be designed with climate change considerations, and many of the proposed types of infrastructure will directly support climate resilience.
2. Technical support towards improved planning and local management (3 million USD). This component aims at providing technical support to local actors, in particular the municipal institutions, as well as the regional councils and other relevant local institutions (associations, private sector representation, etc.), to improve their capacity to prepare and implement development plans that will yield higher impacts in access to services, economic development and poverty reduction.
3. Project management (5 million USD). This component will support the implementation of all project activities in accordance with the Bank's policies and guidelines in the area of coordination, supervision, financial management, procurement, audits, safeguards, monitoring and evaluation.
4. Contingency Emergency Response Component (0 million USD). Should a natural event precipitate a major disaster affecting the livelihoods of people living in the project area, the government may request the World Bank to reallocate project funds to cover some costs of emergency response and recovery.

ACCOUNTABILITY MECHANISM OF WORLD BANK

The World Bank Inspection Panel is the independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by a World Bank-financed project. If you submit a complaint to the Inspection Panel, they may investigate to assess whether the World Bank is following its own policies and procedures for preventing harm to people or the environment. You can contact the Inspection Panel or submit a complaint by emailing ipanel@worldbank.org. You can learn more about the Inspection Panel and how to file a complaint at: <http://ewebapps.worldbank.org/apps/ip/Pages/Home.aspx>.
