Project Description

The objective of this Technical Cooperation is to strengthen Brazil's capacity to operationalize the National Care Policy (Law No. 15,069/2024) by generating operational evidence and tools, and institutional capabilities required to plan, prioritize, and scale up care services across the life course. Specifically, the TC will: (i) produce operational inputs - including unmet demand estimates, cost and financing assessments, targeting instruments, user registries, and quality monitoring systems - to support the planning and investment prioritization of care services; and (ii) strengthen coordination mechanisms and institutional capacities across sectors and levels of government to support the implementation of the National Care Policy and Plan (Plano Nacional de Cuidados - Brasil que Cuida).

ACCOUNTABILITY MECHANISM OF IDB / IDB INVEST

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IDB Invest)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IDB Invest is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
