Project Description

According to the Bank’s website, the objective of this project is to strengthen/deepen the methodology in the countries that participated in the first phase of the project. Carrying out the methodology replication exercise was a first step, therefore, it is recommended that the countries internally discuss their results and, mainly, use them as inputs for the analysis of their programs and for financial, programmatic and operational planning. Likewise, to regionally enrich the implementation of the methodology, based on the experience of the countries of the first phase and the support of UCSF. Adoption of the methodology as the official one at the regional level, for the analysis of disease burden in the 8 SICA member states.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
