## Project Description

This TA will support the government's policy objective of increasing the share of renewable generation serving RMI's electricity demand, and is consistent with the ADB's Interim Pacific Approach, 2015. The preparation of investments in Majuro's network to allow increased renewable generation will allow RMI to program financing, including from ADB, to implement investments in clean energy.

### ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: <http://www.adb.org/site/accountability-mechanism/main>
