Project Description

The development objective is to accelerate climate action by (i) advancing the low-carbon energy transition; (ii) promoting sustainable land use; and (iii) building resilience and adaptation to climate change.

The program addresses long-term state priorities that span administrations while contributing to the provision of global public goods, in particular climate mitigation. The program highlights policy reforms in sectors critical to Colombia's low-carbon development and climate adaptation agendas, which the government also wishes to accelerate.

- Pillar 1 contributes to implementing the nationally determined contribution (NDC's) low-carbon development priorities in the energy, and transport sectors.
- Pillar 2 contributes to implementing low-carbon development priorities in the land and land use sector. In doing so, it covers sectors representing 90 percent of Colombia's greenhouse gas (GHG) emissions, which constitute the key to achieving the mitigation commitments of Colombia's NDC.
- Pillar 3 contributes to implementing NDC adaptation actions, including integrating disaster risk management (DRM) ,climate adaptation, and adaptation in the agriculture sector.

ACCOUNTABILITY MECHANISM OF THE WORLD BANK

The World Bank Inspection Panel is the independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by a World Bank-financed project. If you submit a complaint to the Inspection Panel, they may investigate to assess whether the World Bank is following its own policies and procedures for preventing harm to people or the environment. You can contact the Inspection Panel or submit a complaint by emailing ipanel@worldbank.org. Information on how to file a complaint and a complaint request form are available at: <https://www.inspectionpanel.org/how-to-file-complaint>
