Canaveral-Rio Lindo Hydropower Complex Rehabilitation and Upgrading
Project

Quick Facts

Countries	Honduras
Financial Institutions	Inter-American Development Bank (IADB)
Status	Approved
Bank Risk Rating	B
Voting Date	2015-03-12
Borrower	Government of Honduras
Sectors	Energy, Hydropower
Investment Type(s)	Loan
Investment Amount (USD)	\$ 23.00 million
Project Cost (USD)	\$ 167.18 million

Project Description

FROM IADB:

The objective of the project is to recuperate and to conserve the power generation capacity from renewable energies, contributing to energy security, through the improvement of the efficiency and the extension of the lifespan of the power generation and transmission infrastructure. The specific objectives are: i) to rehabilitate the power infrastructure of the Canaveral and Rio Lindo power stations, ii) to rehabilitate the transmission infrastructure that connects the power stations to the grid; and iii) to improve the ENEE's operational and commercial efficiency generation management.

Investment Description

- Inter-American Development Bank (IADB)

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
