## Project Description

According to IFC website, the Project is focusing on boosting competitiveness by eliminating the barriers to investment, facilitating access to markets (trade) in line with the Reform Agenda as signed up to by the BiH authorities; and echoes the focus of the new WBG country partnership framework in creating conditions for accelerated private sector growth. Furthermore, the project is fully aligned with the goals of the Southeast Europe 2020 Strategy, which considers growth in food production (agribusiness), job creation, trade and investment as a high priority.

The objective is to improve business environment in BiH and competitiveness of its business through three components: (a) Improving business regulations and quality infrastructure at national and entity level to reduce regulatory costs; (b) Strengthening investment policy and promotion to facilitate investments; (c) Facilitating access to market (intra-regional and inter-regional) by reducing private sector costs in the movement of goods across border.
