## Project Description

According to the Bank's website, the project consists of the provision of an investment in an amount of EGP 927 million, gross of fees and accrued interest, in a receivables securitisation local currency bond programme, consisting of five tranches with varying returns and maturities, in favour of El Taamir for Securitization Company ("El Taamir" or the Issuer), a special purpose vehicle (SPV) incorporated in Egypt and established by the New Urban Communities Authority (NUCA).

The Bank's proceeds will be used by NUCA to fund municipal investments in new cities. This sustainable urban development is in line with the Government's aim to redistribute the population away from the Nile Delta. These investments are to meet EBRD's investment criteria and include a range of municipal infrastructure projects such as those related to water, sanitation, treated water storage and pumping stations, street lighting and power transmission.
